## ALPR Anywhere (Ultra-Mobile Automated License Plate Recognition)

Road Warrior is the latest ultra-mobile configuration of VeriPlate, the most advanced ALPR solution available today. Mounted on an existing radar, traffic or speed trailer, the system can be deployed quickly and efficiently and without being noticed by passing traffic. Just hook it up, tow it, position it and leave it alone.

The Road Warrior system transmits all image data, reads it and alerts a variety of assets including patrol vehicles, covert undercover vehicles and handheld devices, i.e. Blackberry, PDA — even cell phones. Data is also transmitted to the VeriPlate Intelligence Server and Communications Engine (VISCE) database at headquarters where full, historic search, pre- and post-incident analysis and geofencing applications are available. The system is powered by heavy duty deep-cell batteries and can run simultaneously with other trailer electronics for up to 24 hours between charges.

### Patrol Vehicles

Alerts from Road Warrior can be sent directly to patrol vehicles, notifying the officers of wanted vehicles and whereabouts.

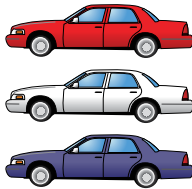

### Command Center

VISCE intelligence database at headquarters receives all images and reads from the Road Warrior system which are then made available for search purposes and pre / post incident analysis.

### Covert Vehicles

Covert vehicles can park blocks away from the Road Warrior trailer and monitor all vehicle reads as they pass the cameras.

### Handheld Devices

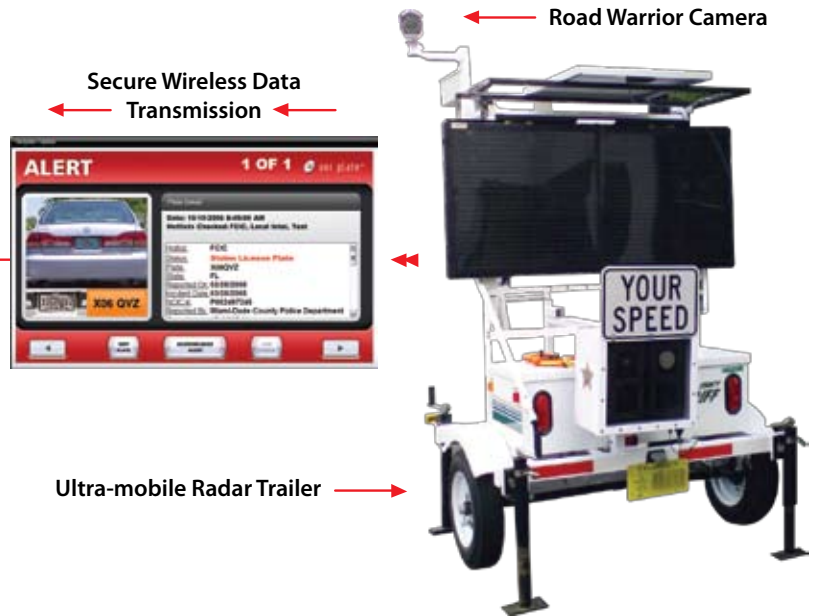

Text messages stating tag number and alert can be sent to handheld devices, notifying officers that a vehicle of interest has just passed Road Warrior.

## Track, Intercept and Gain Intelligence

- Stolen Vehicles
- Sexual Predators
- Warrants

- Gang Members
- Wanted Felons
- And more...

## Benefits

- Runs off batteries
- 12 to 24 hour continuous use
- IR and color camera technology
- Secure wireless transmission
- Remote monitoring and alarms
- State/NCIC network ready
- Ultra mobile ALPR solution
- VISCE database for HQ
- Reads up to 3,600 tags per hour
- GPS enabled
- Day and night operation
