Benefits

Improved traffic flow and safety in emergency zones

Reduced pedestrian vs. vehicle incidences

Better management of reserved and private parking spaces for authorized vehicles

Easier monitoring and ticketing of parking violations

Windows   ALPR

PlateParQ™ by NDI Recognition Systems® is ideal for car park management, supermarket and shopping centers, military stations, and public safety personnel.

The PlateParQ Parking Enforcement Software enables security and car park managers to automatically generate offenses for unauthorized vehicles in private, restricted, reserved, time-permitted or emergency parking zones. Through quick and easy reporting of violations and the use of License Plate Recognition (LPR) technology, users can preserve parking spaces for authorized users while maintaining space availability and traffic flow in larger car parks such as, malls, universities, and airports.

Application for use

- Safety / Rescue Zone Parking
- Private and Reserved Parking
- Time-limited Parking Management

- Car Park Flow and Management
- Street Parking Management

NDI Recognition Systems, 105 E. State Road 434, Winter Springs, Florida 32708
