## **NDI Recognition Systems Achieves First Ever Silver Certification From UK Home Office NAS Programme for Management Server.**

**Nantwich, U.K.**, October 9, 2017 – NDI Recognition Systems® (NDI-RS) today announced they are the first company to have received UK Home Office Certification for Management Server Products. As a Silver Certified partner, NDI Recognition Systems can now offer NAS accredited software and services to each of the UK’s 45 territorial police forces and national law enforcement bodies.

Invited by the Home Office to test for certification, NDI-RS was able to complete all Bronze and Silver Stage testing requirements to reach approval. The acceptance criteria had to be demonstrated and met under categories of *Data Exchange, Information Assurance, NRD Ingestion, Performance and Capacity and Resilience*, to name a few.

As a NAS Management Server provider, NDI-RS’s VISCE® and VeriPlate® software solutions will provide seamless communication between UK Police Forces and the National ANPR Service. The NDI-RS Management Server provides a compliant and secure delivery of information to bolster data sharing across the UK policing landscape. This access will increase the ability to detect, deter and disrupt criminality leading to increases in solving criminal cases and monitoring for potential terrorist and organized crime threats with added ease and efficiencies.

“NDI has always been a UK leader in Automatic License Plate Recognition,” stated Stuart Nicoll, Head of Development for NDI-RS. “We are proud our Management Server products have been accepted and certified for use across the UK. It’s an honor to continue providing the right tools needed to protect the UK against criminality.”

### About NDI Recognition Systems

NDI-Recognition Systems is a global provider of Automatic License Plate Recognition Systems (ALPR) for law enforcement, military and commercial markets. For nearly 30 years NDI Recognition Systems has designed, manufactured and delivered customer-driven license plate technologies. Our technologies help to alleviate the tedious, and often manual, task of identifying unregistered or stolen vehicles, persons of interest and organized crime. With home offices in the UK and Winter Springs, Florida in the US, NDI Recognition Systems remains committed to ongoing research and development for the advancement of recognition systems.
